

FREQUENTLY ASKED QUESTIONS

1. What are Energy Attribute Certificates (EACs)?

Energy Attribute Certificates (EACs) are tradable certificates that verify the origin of renewable energy. They provide proof that a specific amount of energy has been generated from renewable sources, helping companies meet their sustainability and regulatory goals. EACs include types such as Guarantees of Origin (GOs), Renewable Energy Guarantees of Origin (REGOs), and Renewable Energy Certificates (RECs), among others.

2. Why should my company use EACs?

EACs are essential for companies aiming to demonstrate their commitment to sustainability and comply with regulations. They offer a practical solution for meeting emissions reduction targets when on-site renewable energy generation is not feasible. Using EACs can enhance your environmental credibility and improve sustainability reporting.

3. What types of EACs are available?

EACs vary based on energy type and region. Key types include:

- **Guarantees of Origin (GO):** Used in Europe to confirm electricity from renewable sources.
- **Renewable Energy Guarantees of Origin (REGO):** Specific to the UK, verifying renewable electricity use.
- **Green Gas Certificates (GGC, RGGOs):** Certify renewable biomethane gas in the UK.
 - Electronic certificates used in the UK that serve as proof of the production and injection of renewable gas into the grid
- **Renewable Energy Certificates (REC):** Used in North America for proof of renewable electricity.
- **International Renewable Energy Certificates (IREC):** Provide global proof of renewable energy consumption.

4. How does Redshaw Advisors assist with EACs?

Redshaw Advisors offers comprehensive support in procuring EACs. Our process includes collaborating with you to set sustainable energy targets, reviewing your energy consumption and market options, recommending suitable EACs, and managing the procurement process to secure the best terms. We ensure a transparent and tailored approach to help you achieve your renewable energy goals.

5. How can I get started with EACs and renewable energy solutions?

To get started, you can visit our website at www.redshawadvisors.com/renewable-energy for more information. Alternatively, you can call us at 020 83637 1055 to schedule a free consultation. Our experts will guide you through the certification process and help you find the best solutions for your company's renewable energy needs.

6. What alternatives are there to EACs?

For companies with ambitious sustainability goals, a Power Purchase Agreement (PPA) offers a direct way to support new or existing renewable energy projects. PPAs allow organisations with high energy demands to secure renewable energy over a contracted period of 1-20 years. Redshaw Advisors can help navigate the complexities of PPAs and find the right supplier to meet your energy needs.

Why partner with us?

Unmatched Expertise

Benefit from our two decades of experience in carbon trading, compliance, and renewable energy markets, ensuring you navigate complex challenges with confidence and precision.

Advanced Insights

Leverage our industry-leading reports and strategic insights to make informed decisions, manage financial risks, and stay ahead of market trends in the ever-evolving environmental landscape.

Trusted Authority

Partner with a recognised leader in environmental markets, offering expert guidance to help you advance towards a net-zero future while effectively managing financial and reputational risks.
